Background

Academy Trusts are able to make investments and these investments can be a good source of funding but can also expose organisations to risk.

A financial investment is when an investment is made to get the best financial return within the level of risk considered to be acceptable. The Charity Commission (2011) advises that trustees have several legal responsibilities when making financial investments. They must:

- Know and act within their academy's powers to invest.
- Exercise care and skill when making investment decisions.
- Select investments that are right for the academy. This means taking account of:
 - ✓ How suitable any investment is for the Trust?
 - ✓ The need to diversify investments.
- Seek independent professional advice from someone experienced in investment matters
- Follow certain legal requirements if they are going to use someone to manage investments on their behalf.
- Investments will be reviewed at a minimum annually.
- Explain their investment policy in their annual report.

Trustees must be clear about what they aim to achieve through financial investment. They must consider exactly what they want to do, how they intend to do it and what the timescale will be. They must also consider the Trust's long- and short-term financial commitments as well as its expected income.

Risk

A certain degree of risk is associated with all investments, so trustees must do all they can to manage risk levels. Before any investment decisions are made, trustees must consider the level of risk they are able to accept, as a Trust this should be at a low risk. They must be satisfied that the overall level of risk they are taking is appropriate for the Trust. Losses may result in a low return on an investment, or the complete loss of all money invested. If this occurs, trustees should review their approach to risk and take the opportunity to learn from their experiences.

Introduction

The Trust is careful with the public money it is entrusted with. We carefully invest any money that is not required to cover anticipated expenditure and take steps to manage the risk associated with financial investments. We will consider and determine a safe level of positive bank balance which is required before any money is invested e.g. 3 times the monthly pay run.

Objectives and Targets

The purpose of this policy is to ensure that any surplus funds are invested well so that they achieve the best financial returns with the minimum of risk. Good financial returns mean that more money can be spent on educating pupils.

Action Plan

Adequate cash balances must be maintained to ensure there are always sufficient funds in the academy current account to cover financial commitments such as payroll and day to day expenses. If there is a surplus of funds after all financial commitments have been considered, this surplus will be invested. However, we will consider and determine a safe level of positive bank balance which is required before any money is invested e.g. 3 times the monthly pay run.

Funds should be invested in tranches of up to £50,000 and after agreement from the Finance Director and the FRS Committee. It may be beneficial to invest each tranche with a different financial institution. Funds, and any interest they earn, will be automatically reinvested, unless they are required for immediate or anticipated expenditure.

Monitoring and Evaluation

The Chief Finance Officer (CFO) alongside the named Finance Director will compare alternative investment opportunities every six months to ensure that the Trust funds achieve the best interest rates.

The CEO and CFO are responsible for ensuring this policy is adhered to.
